
CITY OF HUDSON

WWTP UPGRADE

Delaware Engineering is assisting the City of Hudson with Combined Sewer Overflow compliance and upgrades to aging plant facilities. The project involves the planning, permitting, design and construction of a new influent pump station and headworks capable of handling 17 MGD in accordance with the City's Long Term Control Plan. Other aspects of the project include upgrades to the 6.0 MGD aeration system,

primary and secondary clarifiers, replacement of the sludge processing equipment, sodium hypochlorite storage and feed systems, and upgrades to a 5 MGD off-site pumping station. The project is financed by the American Recovery and Reinvestment Act (Stimulus).

Estimated Costs: \$14 million
Facility Capacity: 16.9 MGD Primary
2.8 MGD SPDES
